

YOU ARE INVITED TO A CLIENT INFORMATION EVENING

Sweet itch and pinworm are two of the most common causes of itchy horses. Both of these conditions are seen commonly in equine practice and have a significant effect on the horses' quality of life.

Elanco Companion Animal Health will be joining forces with the British Horse Society, The Blue Cross, The Horse Trust, Redwings Horse Sanctuary and World Horse Welfare to raise awareness of summer skin conditions, such as sweet itch, during **Sweet Itch Awareness Month in March**. The campaign will highlight the preventative measures that should be carried out to help alleviate sweet itch and the importance of management of the condition before the start of the midge season in the spring.

We hope you can join us on:

Wednesday 7th March at 7.30

at

Milbourn Equine-Ashford

for an evening of dermatological discussion!

Firstly Andrea Bradley VN from Elanco animal health will introduce Cavalesse, a new product for the control of sweet itch and advise on the control of this condition.

Then one of our vets Nicky Kerbyson BVMS MRCVS will talk about the recent emergence of pinworm, and what we can do to control this problem.

Places are free, but seats are limited so please call the office on 01233500505 to confirm your place. A buffet will be provided.
